FEMS : year report 2021

Since our last meeting earlier this year the situation has changed a lot and this thanks to the massive vaccination… it seems that Belgium is one of the most vaccinated countries in Europe and especially Flanders (90 %) and then Wallonia (80 %), Brussels (60 %) having the worse numbers for the moment.

Thanks to this massive vaccination some of the restrictions could be stopped and so the path to a normalization is in the right way…

Also the mouth mask will not be mandatory any more except if the distance can not be respected and use in public transportation remains the rule.

Schools are open under more normal conditions and only in changing of location a mouth mask is mandatory.

The social and cultural events are now organized more or less like before but provided the use of the Covid Safe Ticket.

Also sport events could be attended again using the COVID Safe Ticket what is a big relief.

Concerning the trainees as Belgium is a federal country there is a different approach between Flanders and Wallonia where the Flemish follow colleagues follow the colleagues of the trade unions where in Wallonia the application of the Working Time Directive must be respected fully while in Flanders over hours are possible but must be compensated…

Bernard Maillet
Head of Delagation for Belgium
